

CLEAR COMFORT® PREMIUM AOP SYSTEM

Advanced Oxidation Process — crystal-clear water with the lowest possible chlorine levels.

WHAT IT IS

Bullfrog Spas' Premium AOP System by Clear Comfort® is an automatic advanced oxidation water treatment system. It generates hydroxyl radicals — the most powerful oxidative compounds used in recreational water care — to destroy contaminants on contact while filtration runs. Result: crystal-clear, soft-feeling water with chlorine at drinking-water levels (0.5 ppm or less), far fewer toxic chemicals, and none of the red eye, skin irritation, or odor from high combined chlorine. Standard on Swim Series. Optional upgrade on M Series and A Series. Cartridge lasts 1–3 years depending on use.

HOW IT WORKS

1 PULLS O₂ FROM AIR

System draws ambient oxygen (O₂) through a vent. No water ever passes through the unit.

2 CONVERTS TO O[•]

Patented AOP process splits O₂ into atomic oxygen (O[•]) — highly reactive charged oxygen molecules.

3 INJECTS INTO PLUMBING

Charged O[•] is injected into spa plumbing via a Venturi. Runs automatically with each filtration cycle.

4 HYDROXYL RADICALS

O[•] reacts with water to form hydroxyl radicals (OH[•]) that rapidly destroy bacteria, organics & contaminants.

PROVEN BENEFITS

Chlorine ≤ 0.5 ppm

Maintain drinking-water chlorine levels — soft, non-irritating water every soak.

No red eye / odor

Eliminates combined-chlorine problems: red eyes, skin irritation, and chemical smell.

30–50% less chemical cost

Lower chlorine and oxidizer use means less spending and less chemical storage.

99.99% Crypto reduction

4-log reduction of *Cryptosporidium parvum* — proven third-party performance.

50–90% less chloramines

Dramatically cuts combined chlorine (chloramines) for fresher, healthier air and water.

Extends spa life

Non-corrosive water is gentler on shells, jets, heaters, and plumbing over time.

SYSTEM SPECS

- Size: 7" × 11" × 5"
- Max flow rate: 30 GPM
- Voltage: 110–230V self-adjusting
- Power consumption: 10 Watts
- Injection method: Venturi
- No water passes through unit
- Runs with every filtration cycle
- Hydroxyl-based AOP (not UV/ozone)
- Award-winning Clear Comfort tech

MAINTENANCE

- Cartridge change every 1–3 years
- Swap takes about 1 minute
- No lamps, no tools, no downtime
- Control unit: 3-year warranty
- Cartridges: 1-year warranty
- Low-touch daily water care
- Pairs with FROG @ease® or
- granular chlorine protocols
- Minimal test-and-adjust routine

AVAILABILITY

- Swim Series: STANDARD
- M Series: optional upgrade
- A Series: optional upgrade
- Tuned specifically for Bullfrog
- Integrates with spa filtration
- Designed for portable spas &
- swim spas / plunge applications
- Ask about upgrade pricing
- Authorized dealer install/support
