SHELL CONSTRUCTION

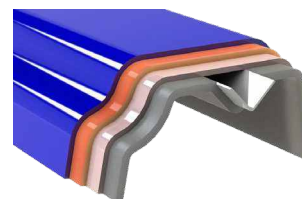

Premium-Grade Acrylic

Ergonomic Design

MOST DURABLE SPA IN THE INDUSTRY

Durability is paramount when it comes to your home investments. That's why Cal Spas utilizes our Fibersteel Construction™ process. Our patented 7-layer laminate system, aided by steel and wood reinforcements, makes our spa shells the strongest available. The finest acrylic sheets are vacuum molded into shape, then reinforced with vinyl ester and fiberglass. After curing, the shell receives a resin filler coat, fiberglass and calcium carbonate. 1½-inch angled irons and stiffener reinforcement supports are added to ensure maximum strength. A final filler coat is applied to seal, bond, and toughen the overall structure.

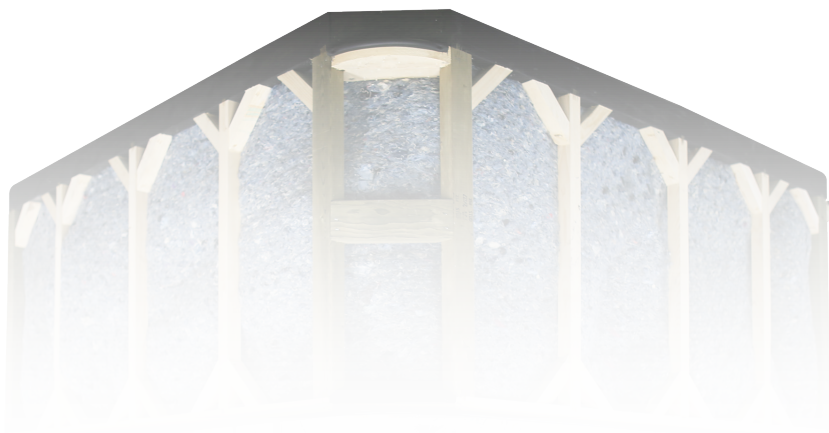

PRESSURE TREATED CABINET FRAME

Cal Spas specially-designed cabinet frames are treated to resist rot, corrosion, and invasive pests and insects. Our American-made Pressure Treated Cabinet Frames are constructed using 1-inch galvanized steel fasteners, corner gussets, and vertical angle bracings for added beam support.

RECYCLED DENIM INSULATION

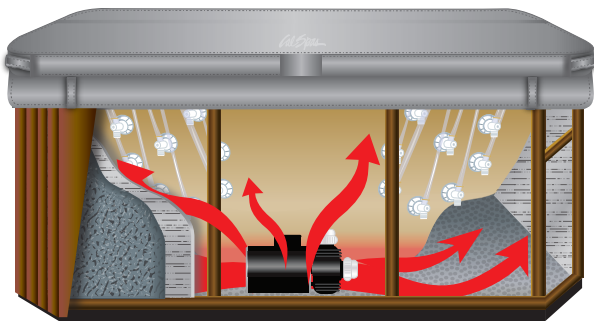

Denim insulation provides an exceptional alternative, with many benefits unique to itself: it is low density and offers better reduction of thermal energy. Low density materials are chosen to insulate our spas because they resist thermal transfer.

INSULATION

The Cal Spas engineering team never stops pushing the boundaries of state-of-the-art home resort technology. Our cutting-edge insulation techniques maintain the temperate waters of your tub by keeping the system's temperature protected from outside environmental influence. This means your spa operates at the highest level of efficiency and will always be ready to welcome you at the end of a long day.

Using state-of-the-art engineering, Cal Spas utilizes the best insulation techniques in order to prevent heat from escaping the spa. By maintaining proper temperature and keeping the system's temperature closed off from outside environmental influence, the spa is able to provide a far more enjoyable and stable warmth.

PEACE & QUIET

Whether you choose to soak in soothing silence or with your own relaxing playlist via one of our available spa speaker systems, you'll do so while your tub churns and heats the waters in whisper-soft silence.

BETTER FREEZE PROTECTION

Cal Spas design technology protects the integrity of both tub and operating components in an efficient, environmentally-friendly way.

MAINTENANCE & SERVICE

Thermo-Shield™ equipped spas don't just stay warmer, they're also easier to perform maintenance on compared to conventionally insulated spas.

THERMO-SHIELD™

Cal Spas Thermo-Shield™ utilizes environmentally-friendly technology to keep the soothing heat of your tub's waters locked in at all times. First, a 3" thick insulation material comprised of post-consumer recycled denim is thermally bonded with a 99% pure aluminum reinforced foil sheet creating a radiant heat shield. This technology directs the system's residual heat back into the spa for increased heating efficiency. A dual-walled layer of reflective bubble foil is installed under the spa's floor to reflect ambient heat upward throughout the tub. Lastly, a unique thermoplastic polymer liner locks in heat while keeping external moisture out.

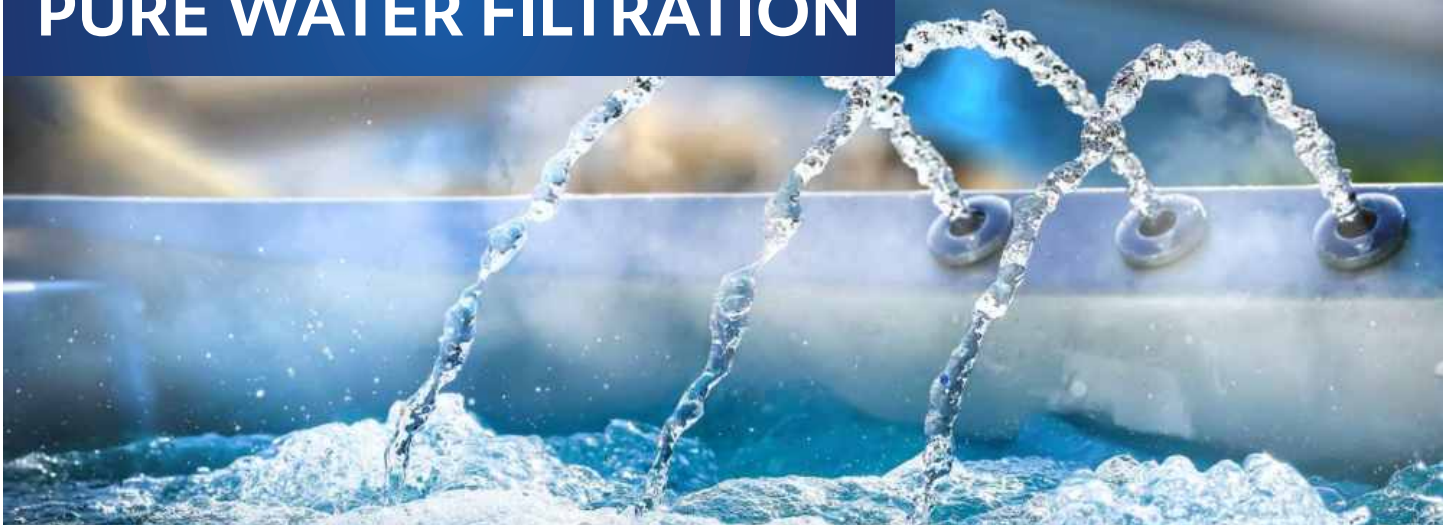

THERMO-LAYER™ FLOOR INSULATION

- Our specially designed, added layer of insulation keeps cold out and retains heat.
- Temperate layers reflect heat back into the spa —not away from it.
- Prevents temperature from cold cement subfloors from reaching the spa waters.

THERMO-GUARD™ FULL FOAM INSULATION (Optional)

- High density Thermo-Guard™ Full Foam Insulation locks all plumbing firmly in place eliminating unwanted noise and vibration.
- Closed cell foam provides additional structural support and helps repel wear and corrosion.
- Space between the frame and the spa body includes additional insulation to add an additional layer of protection.
- Finishes with a 2lb. layer of foam for additional insulation from the bottom to the top of the spa.
- Increases energy efficiency.

PURE WATER FILTRATION

Bio-Clean™ Antimicrobial Filter with TeleWeir Gate

Filters are designed to be both easily accessible and to allow for balanced filtration. A special antibacterial agent within the fabric of each Cal Spas filter helps to ward off growth of microbes and bacteria. A TeleWeir Gate prevents debris from re-entering the spa's water system. When you choose a Cal Spas tub, the days of fumbling for awkwardly placed filters and navigating complex chemical balances are over. In fact, managing the waters of your tub is almost as stress-free as easing into it.

Our PureSilk™ and Twin PureSilk™ Ozone Purifiers Will Keep Your Spa Clean and Fresh!

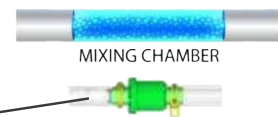

PureSilk™ Ozonator

The Eco-friendly PureSilk Ozonator by Cal Spas features exclusive moisture-sensing technology that instantly eliminates bacteria through exposure to Ozone, minimizing the use of costly chemicals required by other tub brands.

Mazzei Venturi Injector

Mazzei injectors are a unique, patented design that maximizes injector efficiency, suction capacity & mixing capabilities. Trouble free, non moving parts design.

Mazzei Flash Reactor / Mixing Chamber

Designed to Promote Re-direction of Gas Mixture High Mass transfer efficiency with minimal contact time.

CAL SALT FILTRATION

WHAT IS CAL SALT™?

The Cal Salt Filtration™ system uses natural salt to generate just the right amount of chlorine for balanced filtration - ensuring clean, clear, silky-smooth water with less maintenance.

Naturally Sanitizes

Safe, effective, balanced chlorine from salt

Auto-Chlorination

Automated, self-cleaning system for less care

Gentle On Skin

Soft, silky water that is easy on your skin and eyes

Naturally Clean, Silky Smooth —
Effortless Water Care to Clean Your Spa the Right Way

SEATING

Cal Spas hot tubs are meticulously crafted with precision sculpting, resulting in a truly breathtaking product. With a steadfast commitment to both quality and longevity, each spa is expertly designed to immerse you in the most comfortable seating position possible, while simultaneously soothing away any tension and stress.

Lounge Seat

Sink deep into the bubbly waters of your tub with the Lounge Seat, constructed with specially positioned spa jets that target both the upper and lower body for soothing hydrotherapy sessions.

Bench Seat

Accommodating your entire party is easy when you select the Cal Spas Bench Seat. Side-by-side seating allows for ease of movement while enjoying close proximity to your fellow guests.

Cool-Off Seat

Want to ward off the chill you might get entering or exiting your spa? You can with Cool Seat, our cleverly designed transition seat that keeps spa users half-immersed for a proper transition from one temperature to another. (Available only on Avalon, Cancun, Kona, Baja, Costa and Hawaiian Spas).

SEATING

When we say that every Cal Spas hot tub is capable of providing years of unparalleled relaxation, we truly mean it. Our commitment to excellence is reflected in the intricate sculpting of each spa, which is masterfully crafted to fit the unique contours of your body. This tailored approach ensures that every seat is ergonomically optimized for ultimate comfort, allowing our powerful jets to expertly massage and soothe your muscles in the most rejuvenating way possible.

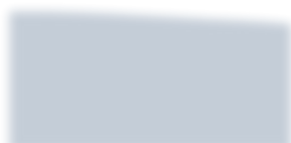

Precision Muscle Relief Therapy

At Cal Spas, we understand that many of our customers seek an ultimate hydrotherapy experience for the particular demands of their body. From our innovative contoured seats and strategically positioned jet systems, each of our spas offers a full body hydro-massage by simply sitting in different areas of your home spa.

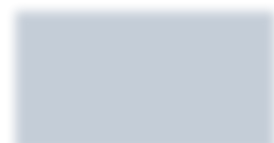

Ergonomic Lounger Seat

Ergonomic Lounger Seat: For those eager to recline in bubbling spa waters and let the worries of the world fall away, the Ergonomic Lounger Seat provides a subtle yet potent hydrotherapy massage.

Quad Neck Jets and Multi-Jet Seat

For active athletes, and for professionals who work seated or on their feet all day, Cal Spas designed the Quad Neck Jets and Multi-Jet Seat specifically with massage therapy in mind.

Soft Tissue Massage Seat

For extremely active individuals in the market for a home spa that offers a full body massage, the Soft Tissue Massage Seat is designed for you. The larger jets in the Soft Tissue Massage Seat are specially-designed to suppress inflammation and accelerate cell recovery for rapid healing.

Adjustable Therapy System PlusTM

Looking not just for a splendid soak, but customizable hydrotherapy for your specific pain area? The Cal Spas patented ATS Plus allows spa users to choose from nine distinctive pulsating levels. This system can be programmed to give an enjoyable massage at your desired level of comfort. A simple control panel allows users to quickly change ATS Plus settings.

Footwell with Tornado Jet

Cal Spas understands that the feet are the foundation upon which the body stands. That's why the Footwell features powerful dome jets to target the sorest part of the feet and massage away aching pain.

Unsurpassed Jet Varieties

Cal Spas features the industry's most dynamic and thorough selection of spa jet faces — each of which have a specialized function that can help you create the best tub experience. Each jet option is positioned in a configuration that delivers effective hydrotherapy massage solutions to specific areas of the body. Users can rotate each jet to the On or Off position for a more personalized spa session every time.

VELOCITY™ JETS

Cal Spas Exclusive Stainless-Steel Velocity™ Jets are designed to combine style and performance seamlessly. The patented “Velocity” design of these jets targets pressure points to provide a powerful and soothing hydro-massage experience. Available in both black and blue stainless steel, these stunning jets come standard on all Escape and Platinum hot tubs. The durable stainless-steel construction ensures long-lasting performance and a luxurious experience that you can enjoy for years to come. With Cal Spas’ Exclusive Stainless-Steel Velocity™ Jets, you get the best of both worlds: cutting-edge technology and exceptional aesthetics.

Deep Tissue Jets

Pinpoint the deepest layers of pain like muscle tissue and tendons with our Deep Tissue Jets. This system is designed to release chronic muscle tension while increasing your circulation and reducing stress levels.

VECTOR™ X JETS

Introducing the *All-New* Vector™ X Jets!

Power. Precision. Performance. The Vector X Jets are here to take your spa experience to the next level! Engineered for maximum hydrotherapy, these cutting-edge jets deliver stronger, more targeted massage action than ever before.

Benefits:

- **Unparalleled Relaxation:** Melt away stress with deep, therapeutic relief.
- **Optimized Water Flow:** Designed for maximum efficiency and power.
- **Advanced Jet Technology:** Engineered for deeper muscle penetration and lasting comfort.

Available on: Escape Series, Escape X Series, Deck Series, Platinum Series and all Swim Series

EQUIPMENT

While some tubs may only come with an on/off switch, Cal Spas goes above and beyond by imbuing each design with a dynamic and unparalleled hydro-therapeutic experience. Our tubs boast low-speed settings that are perfect for both filtration and relaxation, whilst the high-speed settings offer a soothing and invigorating pressurized massage that works wonders on fatigued muscles and joints. Furthermore, our hot tubs efficiently elevate to luxurious temperatures thanks to our cutting-edge 5.5 kW Titanium heaters, which ensure consistent and reliable heating performance for years to come.

CAL SPAS TP700

CAL SPAS TOUCH 2

CAL SPAS
TOUCHSCREEN DISPLAY

Eliminator™ Power Frame Pump

This high-performance pump efficiently circulates and filters your spa's relaxing waters on low speed while delivering unmatched performance and durability on high speed. It's just one of the ways Cal Spas delivers both relaxing comfort and tough love to whatever ails you.

Whisper Power Unit™

All the fantastic features offered by a Cal Spas hot tub are easily managed by large, easy-to-read, full-color digital control panels that operate everything from pumps, lighting, and heaters - all with the simple touch of a button. Spending less time fussing with unintuitive controls means more time relaxing in the swirling waters of your home spa.

Quiet Clean™ 100% Filtration System

Available as an optional feature across our entire line of tubs, the Quiet Clean™ 100% Filtration System is comprised of a 24-hour circulating pump that constantly and quietly heats the water, so your luxurious home spa is always ready to comfort you whenever you need it. The Quiet Clean™ system can help reduce energy costs by minimizing pump operation when your tub isn't being used.

WhisperHot™ Titanium Heater

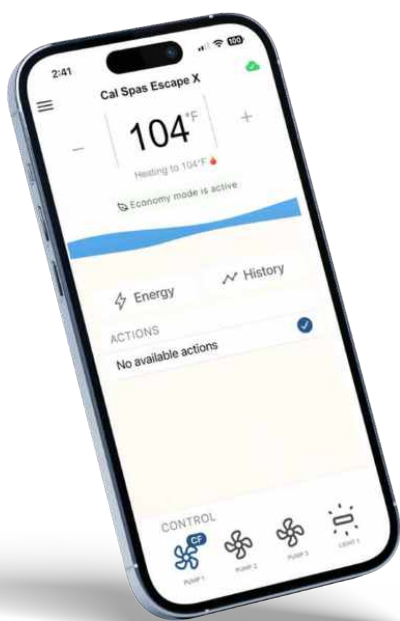

Cal Spas remains committed to innovation, which is why we're proud to offer our custom-developed WhisperHot™ Titanium Heater across our entire spa line. While the warm and enveloping waters of your Cal Spas tub might feel like they're geothermally heated, titanium is the key to the soothing warmth of Cal Spa waters. Even with today's salt sanitizing systems, no other material improves heater longevity like titanium. Titanium contains no iron, so it never rusts or corrodes.

CAL CONNECT

WHAT IS CAL CONNECT™?

Cal Connect™ lets you control and monitor your Cal Spas spa from your smartphone - so your perfect soak is always ready when you are.

Remote Spa Control

Adjust temperature, jets, and lighting from anywhere

Ready When You Are

Heat up your spa before you get home
